Art Unit: 2154

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 15-27 and 33, drawn to remote accessing of data, classified in class 709 subclass 217.
 - II. Claims 10-14 and 28-32, drawn to profiling of clients channel choices, classified in class 705, subclass 33.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as without the required display procedures of invention I. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
